High Cost Medical Drugs List

High Cost Medical Drugs administered by Health Alliance™ providers within physician offices, infusion centers or hospital outpatient settings must be acquired from preferred specialty vendors. Health Alliance will not reimburse any drug listed as a "High Cost Medical Drug," whether obtained from the provider's own stock or via "buy-and-bill."

This drug list does not apply to members with Medicare coverage. Information on how to acquire these medications is located at the end of this document.

See next page for how to acquire High Cost Medical Drugs.

How to Acquire High Cost Medical Drugs on this List

For High Cost Medical Drugs available through LDD, please contact Health Alliance for more information at (800) 851-3379, option 4.

For High Cost Medical Drugs available through Optum Specialty Pharmacy, please complete the appropriate Optum Specialty Pharmacy Enrollment Form to expedite the acquisition process.

After determining the prescribed medication is on the High Cost Medical Drugs List, please submit preauthorization if required. Health Alliance may ask for lab values and chart notes to support the diagnosis. Health Alliance uses manufacturer recommendations and current literature in making coverage decisions. Health Alliance may ask for lab results if the patient has never been on the drug before, or if there has been an interruption in treatment. Ongoing cases with an existing regimen usually require additional chart documentation of how the treatment regimen is going, as well as possible lab verification, if applicable, to continue specialty therapy.

Process for receiving medication once authorized:

1. The Health Alliance Pharmacy Department will fax you notification of preauthorization, including the start and expiration date.
2. When you receive preauthorization from Health Alliance, please phone (855-427-4682), fax the number on the appropriate Enrollment Form, or E-Prescribe the prescription to Optum Specialty Pharmacy.
    a. You can send in the prescription before the preauthorization is approved, but please note that this may cause a delay in shipment. **Optum Specialty Pharmacy will not ship any medication without verifying with Health Alliance that an approved preauthorization is on file.**
3. Optum Specialty Pharmacy will verify shipment information with the prescriber's office and contact the patient to verify payment.
4. Optum Specialty Pharmacy will reach out to your office 5-7 days prior to the next infusion date. Optum Specialty Pharmacy will also notify the provider if the prescription has expired.
5. When the preauthorization for the prescription has expired, you must submit a new request for preauthorization through Health Alliance. Health Alliance may ask once again for lab values and/or chart notes to continue coverage for the therapy, and the process will start over again.

Under special circumstances, if you have approval to stock a specialty medication, the reimbursement will be the Health Alliance specialty rate plus/minus the patient's copayment or coinsurance. You are responsible for collecting the copayment or coinsurance.
