

Oncology Care Coordination

If you or a loved one has cancer, our care coordinator can help. Call the number on the back of your member ID card to learn more.

Dealing with cancer can be stressful, but our Oncology Specialty Care Coordination program is here for you. We'll pair you with a coordinator who will:

- Evaluate your unique needs.
- Help you understand the treatment plan your oncologist has outlined for you.
- Connect you to our representatives or your provider for any questions about prior authorizations.
- Ensure your doctors and specialists are talking and working together.
- Help you communicate effectively with your providers and health plan about your needs.
- Find resources and support for your physical and emotional health.

Our care coordinator will remain by your side through the entire course of treatment, and for months after remission or the end of your treatment plan.

Sign up today by calling the number on the back of your member ID card.

Care coordination doesn't replace your doctors, but we partner with you and your providers to keep you well and bring you the resources you need. You don't have to do it alone.
