

Take control of your coverage with BenefitFocus.

**We know employers like you are busy.
We can help with this tool made for you.**

BenefitFocus helps you see how your employees are using their healthcare coverage and how your plan is performing overall. With this information at your fingertips, you can make more-informed, cost-effective decisions.

BenefitFocus gives you the complete picture of your health plan costs, including claims information and administrative expenses, with 24/7 access to your group's reports and data.

It provides a streamlined process to filter, build and save reports with interactive online features.

Utilization statistics break down claims by type (inpatient, outpatient and prescription) and compare your group's cost in each area to a benchmark average.

The yearly cost and plan experience summaries help you see how you're doing now, so you can make adjustments to be more cost effective next year.

To get started or learn more, talk to your client consultant today.*

**Please note: BenefitFocus is only available for our self-funded groups. It's not available for those with Balance plans.*
